KINGDOM AI OS

Super User-Friendly Tab Expansion

Every tab made simple, friendly, and powerful
2026-09-30

How to Use This Guide

This document expands every workspace so a non-technical user (or a new team member) immediately understands: what the tab is for, what they can do in 10 seconds, what the chatbot is good at, which agents are ready, and where the advanced tools live. Each tab still has its own chatbot, its own container for safety, and access to the global uncensored model pool (Pirate Face priority).

The 24 Workspaces — Super Friendly Version

1. ■ Home / Command Center

In one sentence: Your front door and mission control.

What you can do in 10 seconds: Open the global chat, see what agents are working, and jump to any workspace with one click.

This tab's chatbot is especially good at: Answering any question using the full power of every model and tool in the system.

Ready agents waiting for you: System Status Agent, Quick Launch Agent, Notification Agent.

Advanced tools (one click deeper): Full system dashboard, global task queue, model health overview.

Color & safety: Orange accent. Highest security — control plane only.

2. ■ LLM / Models

In one sentence: The warehouse of every brain the system can use.

What you can do in 10 seconds: See which models are online, switch the active model, or search for an uncensored version.

This tab's chatbot is especially good at: Helping you choose or compare models, explaining what "uncensored" or "Colibrì" means, and recommending the best brain for a job.

Ready agents waiting for you: Model Health Agent, Uncensored Finder Agent (Pirate Face), Benchmark Agent.

Advanced tools (one click deeper): Full registry, Colibrì huge MoEs, GGUF pool, OpenRouter, evaluation lab, routing rules.

Color & safety: Purple accent. Model-serving isolation.

3. ■ Research

In one sentence: Deep, cited, multi-source research without the fluff.

What you can do in 10 seconds: Type a question and get a structured answer with sources. Or drop a PDF and ask questions about it.

This tab's chatbot is especially good at: Literature reviews, fact-checking, summarizing long documents, finding primary sources.

Ready agents waiting for you: Deep Research Agent, Document Agent (MinerU), Web Research Agent, Citation Agent.

Advanced tools (one click deeper): SearXNG, Agent Reach, Crawl4AI, Firecrawl, academic connectors, knowledge packs.

Color & safety: Teal accent. Research sandbox with controlled outbound access.

4. ■■ Legal

In one sentence: Case work, sovereignty research, and evidence — protected and organized.

What you can do in 10 seconds: Start a new case, upload evidence, or ask a legal research question.

This tab's chatbot is especially good at: Case analysis, claim drafting, precedent search, constitutional/sovereignty questions.

Ready agents waiting for you: Case Agent, Evidence Agent, Precedent Agent, Sovereignty Research Agent.

Advanced tools (one click deeper): Encrypted evidence library, treaty packs, document intelligence, access-controlled folders.

Color & safety: Pink accent. Strict audit + encrypted storage.

5. ■■ OSINT

In one sentence: Open-source intelligence investigations.

What you can do in 10 seconds: Enter a name, company, or domain and get a structured intelligence report.

This tab's chatbot is especially good at: Person/company investigation, exposure checks, social & web intelligence, threat monitoring.

Ready agents waiting for you: Investigation Agent, Exposure Agent, Social Intel Agent, Threat Agent.

Advanced tools (one click deeper): Agent Reach, Browser Use, SearXNG, specialized sources (OpenCorporates, OpenAlex, ICIJ, Old Maps Online, etc.).

Color & safety: Green accent. Careful network + Credential Broker.

6. ■ Finance

In one sentence: Financial analysis and modeling (no direct bank access).

What you can do in 10 seconds: Ask for a model, ratio analysis, or cash-flow projection.

This tab's chatbot is especially good at: Financial modeling, scenario analysis, reading statements, currency questions.

Ready agents waiting for you: Modeling Agent, Analysis Agent, Report Agent.

Advanced tools (one click deeper): Interfaces only. Real money and ledger live in the separate Financial Platform.

Color & safety: Gold/yellow accent. No direct ledger. Multi-approval for any real transaction.

7. ■ Investments

In one sentence: Portfolio thinking, markets, and project evaluation.

What you can do in 10 seconds: Paste a ticker or project idea and get a structured view.

This tab's chatbot is especially good at: Portfolio analysis, valuation frameworks, market research, SPV concepts.

Ready agents waiting for you: Portfolio Agent, Valuation Agent, Market Research Agent.

Advanced tools (one click deeper): Research tools + modeling. Still no direct trading execution inside this tab.

Color & safety: Green accent. Same financial boundary rules.

8. ■ Real Estate

In one sentence: Properties, land, and development research.

What you can do in 10 seconds: Paste an address or listing link and get a research brief.

This tab's chatbot is especially good at: Property research, comparable analysis, document extraction, opportunity scanning.

Ready agents waiting for you: Property Agent, Document Agent, Map Agent, Opportunity Agent.

Advanced tools (one click deeper): Scraping, maps, OCR, valuation helpers.

Color & safety: Coral accent. Real-estate sandbox.

9. ■ Business / CRM

In one sentence: Companies, contacts, and pipelines in one place.

What you can do in 10 seconds: Add a company or contact, or ask "show me my pipeline".

This tab's chatbot is especially good at: CRM updates, relationship notes, pipeline status, company research.

Ready agents waiting for you: CRM Agent, Company Research Agent, Pipeline Agent.

Advanced tools (one click deeper): Full contact & organization database, communication history.

Color & safety: Blue-teal accent. CRM sandbox.

10. ■ Leads

In one sentence: Find, enrich, and qualify leads.

What you can do in 10 seconds: Describe the ideal customer and get a list of leads to review.

This tab's chatbot is especially good at: Lead generation ideas, enrichment, qualification scoring, outreach drafts.

Ready agents waiting for you: Lead Gen Agent, Enrichment Agent, Qualification Agent, Outreach Draft Agent.

Advanced tools (one click deeper): Enrichment tools, list management, campaign hand-off to Social/Email.

Color & safety: Orange accent. Approval required for bulk external outreach.

11. ■■ City / Urban Planning

In one sentence: Cities, islands, stadiums, and master planning.

What you can do in 10 seconds: Describe a vision or upload a plan and get structured feedback or next steps.

This tab's chatbot is especially good at: Master planning questions, infrastructure ideas, simulation concepts, architecture briefs.

Ready agents waiting for you: Planning Agent, Simulation Agent, Architecture Brief Agent.

Advanced tools (one click deeper): Simulation tools, technical calculation helpers, document generation.

Color & safety: Purple accent. Engineering-grade sandbox.

12. ■■ Engineering

In one sentence: Technical calculations, robotics, and hard engineering work.

What you can do in 10 seconds: Ask a technical question or drop a spec sheet.

This tab's chatbot is especially good at: Calculations, feasibility checks, robotics concepts, technical writing.

Ready agents waiting for you: Calculation Agent, Feasibility Agent, Technical Writing Agent.

Advanced tools (one click deeper): CAD/tech workflows, scientific tools, GPU when needed.

Color & safety: Teal accent. Can request GPU workers.

13. ■ Coding / Development

In one sentence: Write, fix, and ship software with agents.

What you can do in 10 seconds: Describe a feature or bug and let an agent propose a plan or code.

This tab's chatbot is especially good at: Feature implementation, debugging, tests, PR descriptions, app scaffolding.

Ready agents waiting for you: Codex CLI Agent, OpenHands Agent, Cline Agent, Aider Agent, App Factory Agent.

Advanced tools (one click deeper): Disposable workspaces, Git integration, Dify app builder, Kaggle for heavy jobs.

Color & safety: Pink accent. Every coding agent gets its own disposable container.

14. ■ Web / Scraping

In one sentence: Browse, scrape, and automate the web safely.

What you can do in 10 seconds: Give a URL or task ("log into this site and download the report") and review the plan.

This tab's chatbot is especially good at: Web research, data extraction, form filling (with approval), monitoring pages.

Ready agents waiting for you: Browser Use Agent, Agent Reach Agent, Playwright Agent, Scraper Agent.

Advanced tools (one click deeper): Credential Broker for any login, full audit trail, residential proxy options.

Color & safety: Green accent. Strict network policy + human approval for high-impact actions.

15. ■ News / Magazines

In one sentence: Stay on top of news and publish.

What you can do in 10 seconds: Ask "what happened today in X" or set up a custom feed.

This tab's chatbot is especially good at: News summaries, trend detection, magazine-style writing, RSS management.

Ready agents waiting for you: News Agent, Trend Agent, Publishing Agent.

Advanced tools (one click deeper): RSSHub, Folo, aggregation pipelines.

Color & safety: Yellow accent. Media sandbox.

16. ■ Social / Marketing

In one sentence: Content, campaigns, and social presence.

What you can do in 10 seconds: Describe a campaign idea or paste content for scheduling suggestions.

This tab's chatbot is especially good at: Content ideas, caption writing, campaign planning, analytics interpretation.

Ready agents waiting for you: Content Agent, Campaign Agent, Analytics Agent, Scheduler Agent.

Advanced tools (one click deeper): Publishing tools, Listmonk-style email, analytics connectors.

Color & safety: Coral accent. Approval gates for public posts.

17. ■ Fashion

In one sentence: Design, styling, and virtual lookbooks.

What you can do in 10 seconds: Describe a look or upload a sketch and get variations.

This tab's chatbot is especially good at: Outfit ideas, lookbook generation, style research, virtual model concepts.

Ready agents waiting for you: Style Agent, Lookbook Agent, Virtual Model Agent.

Advanced tools (one click deeper): Image generation tools, Human Studio characters, reference libraries.

Color & safety: Pink accent. Shares media GPU sandbox with Images.

18. ■ Images / Visual AI + Human Studio

In one sentence: Generate, edit, and keep characters consistent — including realistic diverse humans.

What you can do in 10 seconds: Type a prompt or upload a reference and generate. Or create a permanent Character ID.

This tab's chatbot is especially good at: Image generation, editing, character consistency, diverse skin/body/hair, OCR.

Ready agents waiting for you: Image Gen Agent, Character Agent, Consistency Agent, OCR Agent.

Advanced tools (one click deeper): ComfyUI, FLUX + IP-Adapter, InvokeAI, full Human Studio (face/body embeddings, verification).

Color & safety: Purple accent. Explicit support for deep brown skin, curvy bodies, braids/locs/coils, realistic anatomy.

19. ■ Video / UGC / TV / Movies

In one sentence: Create, remake, and edit video.

What you can do in 10 seconds: Describe a scene or drop a reference video and choose a workflow (text-to-video, remake, etc.).

This tab's chatbot is especially good at: Text-to-video, image-to-video, video remake with new character, clipping, storyboards.

Ready agents waiting for you: Video Gen Agent, Remake Agent, Character Video Agent, Clip Agent.

Advanced tools (one click deeper): VACE (Wan2.1-VACE), Wan, LTX, Open-Sora, ComfyUI, FFmpeg, talking-head systems.

Color & safety: Orange accent. GPU-heavy; Kaggle or local GPU workers.

20. ■ Music / Audio

In one sentence: Make music, clean stems, and generate voice.

What you can do in 10 seconds: Describe a track or drop audio for separation / transcription.

This tab's chatbot is especially good at: Beat/melody ideas, stem separation, lyrics, voice generation, mixing notes.

Ready agents waiting for you: Music Gen Agent, Stem Agent, Voice Agent, Transcription Agent.

Advanced tools (one click deeper): Whisper.cpp, F5-TTS, GPT-SoVITS, local stem tools, mixing chain.

Color & safety: Teal accent. Audio sandbox.

21. ■ Agents / Communications

In one sentence: Create agents, give them faces, and let them talk (chat, email, phone).

What you can do in 10 seconds: Open Agent Creator and describe what you need, or pick an existing agent.

This tab's chatbot is especially good at: Building new agents, assigning them to workspaces, reviewing their work, messaging.

Ready agents waiting for you: Agent Creator, Agent Manager, Communications Agent, Identity Agent.

Advanced tools (one click deeper): 100+ conceptual agents library, faces/voices, email (Listmonk etc.), phone/messaging integrations.

Color & safety: Green accent. Strict permission profiles per agent.

22. ■ Tasks

In one sentence: See everything the system is doing or has done.

What you can do in 10 seconds: Filter by Open / In Progress / Completed / Failed or by workspace color.

This tab's chatbot is especially good at: Checking status, retrying failed work, reviewing history, setting recurring jobs.

Ready agents waiting for you: Task Manager Agent, Retry Agent, History Agent.

Advanced tools (one click deeper): Global queue with color coding. Click any task to jump to its workspace.

Color & safety: Yellow accent. Control-plane service.

23. ■ Open Source / Apps

In one sentence: The library of every tool and the place to build new apps.

What you can do in 10 seconds: Search for a tool (Browser Use, Agent Reach, MinerU, VACE…) or open the app factory.

This tab's chatbot is especially good at: Discovering tools, installing skills, building internal apps with Dify-style builders.

Ready agents waiting for you: Registry Agent, Installer Agent, App Factory Agent.

Advanced tools (one click deeper): Full tool registry, MCP servers, Dify, plugin system.

Color & safety: Purple accent. Registry service.

24. ■ Security / Admin

In one sentence: Who is trying to get in, what happened, and how locked down we are.

What you can do in 10 seconds: Open the security dashboard or ask "show me recent login attempts".

This tab's chatbot is especially good at: Reviewing alerts, checking audit logs, managing users and permissions, backup status.

Ready agents waiting for you: Security Monitor Agent, Audit Agent, Access Agent, Backup Agent.

Advanced tools (one click deeper): Keycloak, secrets manager, Wazuh, CrowdSec, Suricata, full audit, threat profiling.

Color & safety: Red/coral accent. Highest isolation. Continuous self-monitoring of security tools.

Quick Start for Any New User

1. Land on Home. Ask anything in the global chat — the system will route to the best model and tools.
2. Click a colored tab when you want to work in a specialized sandbox (Legal, Video, OSINT, etc.).
3. Every tab has its own chatbot that already knows the tools and preferred uncensored models for that domain.
4. Use Agents inside a tab when you want autonomous work. Review and approve high-impact actions.
5. Check Tasks anytime to see the global picture. Colors tell you which workspace owns each job.
6. Uncensored / Heretic / Abliterated models from Pirate Face are preferred automatically for research, legal, and sovereignty work.

End of Super User-Friendly Tab Expansion

Pair with the Master Architecture Bible and the Deep Tab Guide + Pirate Face Addendum.
